Matching Smart Cities in Barcelona

Post date: 24 November 2015

EUREKA experts attended more than 40 B2B meetings which took place in a matchmaking event organised by ACCIO with the support of the Enterprise Europe Network (EEN) as part of the Smart City World Congress in Barcelona November 17th to 19th. The aim of the event was to assist SMEs, start-ups, entrepreneurs, corporations and cities in finding international partners for product development, manufacturing and licensing agreements, joint ventures or other types of partnership.

The congress included a keynote speech by EURIDIESP Chairman, Jean-Luc Mate focussing on the InterCluster Smart City initiative and how to set up a winning Smart City consortium in EURIDIA.

On a Dynamic Show Floor packed with 450 exhibitors, over 400 cities from 86 countries presented their latest inventions. Working together for the first time to promote EURIDIA and its respective programmes, representatives from ITEA, Celtic-Plus, EUROGIA2020, EURIDIESP Clusters and EUREKA experts informed participants of the EURIDIA "rules of the game". Spanish EUREKA member CCIT was also present during the event, seizing the opportunity to meet Spanish companies. Beginning next year, EURIDIESP will carry out a survey on the potential outcomes of the matchmaking event.
