

# Eligibility criteria & national priorities

## Germany

- Financial support is provided according to national funding procedures:  
<https://www.bmbf.de/foerderungen/bekanntmachung-1662.html>
- Topics
  - SW engineering, Industrie 4.0, embedded systems/CPS, data-driven systems, AI & machine learning, process & system simulation, usability, SW reliability & safety, HPC, parallelization & distributed systems...
- Domains
  - Automotive & mobility, manufacturing, health & medical engineering, logistics & services, energy & environment
- Only strong German sub-consortia with LE, SME, universities, and research organizations can be funded.
- German partners must submit a project summary (in German) to DLR by the deadline of PO submission.

- No dedicated budget for an ITEA 3 call
- Project proposals will be selected according to innovation level and business potential
- Main evaluation criteria:
  - Innovation, social needs
  - Quality of the proposal, technological & business potential
  - Consortium, partner qualification, project management
  - Milestones and KPIs
  - Dissemination and exploitation, market potential
  - European cooperation added value
  - Fulfilment of recommendations from PO phase
